Education

2016–2022 **Ph.D. in Computer Science**, *University of Minnesota*, Twin Cities
2016–2018 **M.S. in Computer Science**, *University of Minnesota*, Twin Cities
2009–2013 **B.S. in Computer Science and Engineering**, *University of Wisconsin*, Madison

Ph.D. Thesis

Title *Analysis of Collective Behavior in Robot Swarms*
Advisor Dr. Maria Gini
Description This thesis developed new theoretical tools for measuring, modeling, controlling, and (critically) predicting the behavior of bio-inspired multi-agent systems from small (≤ 5 agents) to large ($\geq 10,000$ agents) scales. Applications to foraging and construction tasks in dynamic, dangerous, and unknown environments.

Research Interests

Bio-inspired algorithms and design for dangerous and dynamic environments with unreliable communication and unknown workloads. Multi-agent modeling, task allocation, stochastic and differential equation modeling, graph theory, queueing theory approaches.

Experience

- 2022–present **Researcher**, SMART INFORMATION FLOW TECHNOLOGIES , Minneapolis, MN
- Independently identified project work and successfully executed tasks with minimal oversight.
 - Contributed to business development through market research and proposal writing.
 - Developed models of flocking behaviors to extract control policies and parameters automatically from trajectory data to estimate physical properties and limits of vehicles.
 - Reduced debugging time by enhancing in-house tooling for efficient visualization of multivariate spatio-temporal data of large-scale multi-agent systems.
- 2016–2022 **Researcher**, UNIVERSITY OF MINNESOTA, Minneapolis, MN
- Derived cuboid structure model using graph theory to develop simple algorithms to provably manipulate graphs (structures) from one state to another [1].
 - Demonstrated robust predictions of steady-state collective foraging behaviors up to practical engineering limits using differential equation models [4].
 - Showed that the origin of collective intelligence in task allocating swarms lies in self-organized learning task relationships, rather than costs [8].
 - Reduced development cycles and increased utility of automated design methods through better measurements for design principles of multi-agent systems.
- 2016–2022 **Mentor and Advisor**, UNIVERSITY OF MINNESOTA, Minneapolis, MN
- Designed engaging opportunities including contributing to published papers and large C++ software projects for high school and undergraduate students.
 - Mentored undergraduate students interested in AI, robotics, and academic research to apply for grants, publish original research, and present at workshops [9, 12, 5].
- 2013–2016 **Research Engineer**, SOUTHWEST RESEARCH INSTITUTE, San Antonio, TX
- Reduced computing costs through computational optimization of large-scale simulations [14].
 - Lead flight software developer on NASA subcontract for unmanned satellite constellation in collaboration with the University of Michigan.
 - Enhanced utility of POSIX-flavored filesystems for embedded spacecraft applications by developing new file system with smaller, configurable memory footprint and increased robustness.

Projects

- 2016-present **Maintainer**, CORE SWARM LIBRARY,  Github
- Middleware-esque C++ library providing a common, zero-cost API to different platforms, transparently for both real and simulated robot types.
 - C++17 compliant with strong focus on reusability. Integration with Boost.
 - Computationally optimized: Demonstrated efficient execution with systems of over 10,000 robots on HPC clusters and on real systems of Raspberry PI-powered robots.
- 2017-present **Maintainer**, SIERRA: SCIENTIFIC METHOD AUTOMATION,  Github
- Given a user query of an independent variable over a range, generate experimental inputs, run experiments, process results, and generate visualizations [2].
 - Plugin-based python framework supports any agent type, platform (e.g., simulator, ROS, real robot), or execution environment (e.g., HPC cluster, real robot).
- 2016–2022 **Author**, FORDYCA: FORAGING ROBOTS USE DYNAMIC CACHES,  Github
- Consistent use of design principles: SOLID, DRY/WET, interface segregation, etc.
 - Scalable events-based architecture to drive agent controllers.
 - Novel generic event dispatch approach via compile-time reflection.

Fellowships and Awards

- 2022 DAAD AInet Fellow - AI and Robotics (\$N/A)
- 2020–2021 UMII MnDRIVE Graduate Fellowship (\$51,177)
- 2019–2020 GAANN Fellowship (\$20,560)

Presentations

- 2022 A LATTICE MODEL OF MANIPULABLE ENVIRONMENTS FOR PROVABLE MANIPULATION, International Conference on Autonomous Agents and MultiAgent Systems (AAMAS) ARMS Workshop
- 2021 A ROBUST MODEL FOR PREDICTING COLLECTIVE BEHAVIOR IN LARGE ROBOT SWARMS, International Conference on Robotics and Automation (ICRA) Real World Swarms Workshop
- 2020 DEMYSTIFYING EMERGENT INTELLIGENCE AND ITS EFFECT ON PERFORMANCE IN LARGE ROBOT SWARMS, International Conference on Autonomous Agents and MultiAgent Systems (AAMAS)
- 2020 A THEORETICAL FRAMEWORK FOR SELF-ORGANIZED TASK ALLOCATION IN LARGE SWARMS, International Conference on Autonomous Agents and MultiAgent Systems (AAMAS) Doctoral Consortium
- 2020 ROBUSTNESS ANALYSIS IN LARGE ROBOT SWARMS, International Conference on Autonomous Agents and MultiAgent Systems (AAMAS) ARMS Workshop
- 2019 SWARM ENGINEERING THROUGH QUANTITATIVE MEASUREMENT IN 10,000 ROBOT SWARMS, International Joint Conference on Artificial Intelligence (IJCAI)
- 2019 FROM FORAGING TO CONSTRUCTION IN A 1,000,000 ROBOT SWARM, International Joint Conference on Artificial Intelligence (IJCAI) Doctoral Consortium
- 2018 BROADEN APPLICABILITY OF SWARM-ROBOTIC FORAGING THROUGH CONSTRAINT RELAXATION, International Conference on Simulation, Modeling, and Programming for Autonomous Robots (SIMPAN)
- 2018 GENERALIZING TASK PARTITIONING APPROACHES TO ROBOT SWARM FORAGING, International Conference on Robotics and Automation (ICRA) Real World Swarms Workshop
- 2015 A SIMPLE FLASH FILE SYSTEM FOR EMBEDDED SPACE APPLICATIONS, Flight Software Workshop

Teaching Experience

- Spring 2021 **Instructor**, INTRODUCTION OF COMPUTING AND PROGRAMMING CONCEPTS, University of Minnesota, Department of Computer Science
Introductory undergraduate python course via Zoom (30 students).
 - Covered object oriented programming, algorithmic fundamentals and control flow, and basics of version control and development environments.
 - Developed new course material, assignments, and exam questions.
- 2016–2018 **Teaching Assistant**, SOFTWARE DESIGN AND DEVELOPMENT, University of Minnesota, Department of Computer Science
Guided students (class size 100+) in developing a large-scale C++ software project.
 - Tutored students in application of software design principles.
 - Introduced students to common industry toolchains (git, cmake, gcc, gdb).
 - Comprehensively answered student questions in weekly office hours, and actively engaged students with weekly hands-on labs covering course material.

Technical Skills

Theory	Bio-inspired modeling, stochastic processes, differential equation modeling, graph theory, queueing theory
Algorithms	Parallel, greedy, biomimetic, graphical, distributed task allocation
Data Structures	Graphs, trees, R-trees, Poisson queues, heaps, maps, C++ STL
Platforms	Linux: Ubuntu, Raspberry PI Real-time OS: RTEMS Robotics: ARGoS, ROS, Turtlebot3 High Performance Computing (HPC): SLURM, PBS
Languages	Proficient: C (kernel/embedded systems programming) C++ (C++17, templates, metaprogramming) Python (data visualization/processing, REST) Familiar: Fortran, SPARC, bash, MATLAB
Interfaces	Proficient: Boost, OpenMP, pandas, matplotlib Familiar: MPI, FPGA specs, UART, I2C
Software Development	Writing: Design patterns, OOP, polymorphism, concurrent programming Devops: GitHub Actions, GitLab CI Tools: Intel/GNU compilers, LLVM toolchain, cmake, gdb, valgrind, VTune, git

Service and Outreach

- 2022-Present **Committee Involvement**, JOURNALS AND CONFERENCES
 - 2022 Autonomous Robots and Multi-Robot Systems (ARMS) Program Committee
 - 2023 Autonomous Agents and Multi-Agent Systems (AAMAS) Program Committee
 - 2023 Associate for the Advancement of Artificial Intelligence (AAAI) Program Committee
- 2018-Present **Ad Hoc Reviewer**, JOURNALS AND CONFERENCES
 - Frontiers in Robotics and AI
 - Transactions on Robotics (TRO)
 - Autonomous Agents and Multi-Agent Systems (AAMAS, AGNT)
 - International Conference on Artificial Intelligence (IJCAI)
 - International Conference on Robotics and Automation (ICRA)
 - Swarm Intelligence
 - International Conference on Intelligent Robots and Systems (IROS)
- 2018–2019 **Instructor**, MNDRIVE SUMMER TECHNOLOGY CAMP, University of Minnesota
Led outreach activities aimed at broadening the interests of elementary and middle school students in historically underrepresented demographics in STEM.
- 2018–2020 **Instructor**, MNDRIVE YOUTH TECHNOLOGY OUTREACH, Minneapolis, MN
Designed accessible science curriculum and led bi-weekly programming, Arduino, or science related activities. Orchestrated student groups to foster collaboration on technically challenging tasks.
